

AerFusion *eco*™

Schneller Aircraft Flooring

Schneller's AerFusion *eco*™ is a new all-in-one construction NTF specifically designed to support the increasing demands of today's aircraft industry through Patent Pending technology resulting in an enhanced flooring solution.

AerFusion *eco*™ Offers the well-established Schneller NTF benefits including: a large range of color and design options, superior slip, abrasion and telegraph resistance, easy cleaning and maintenance all while providing unique eco-friendly features which include:

- Lower weight construction resulting in enhanced fuel economy
- Material available in continuous roll form yielding less waste
- Low tox product composition that meets the Airbus ABD 0031 requirement

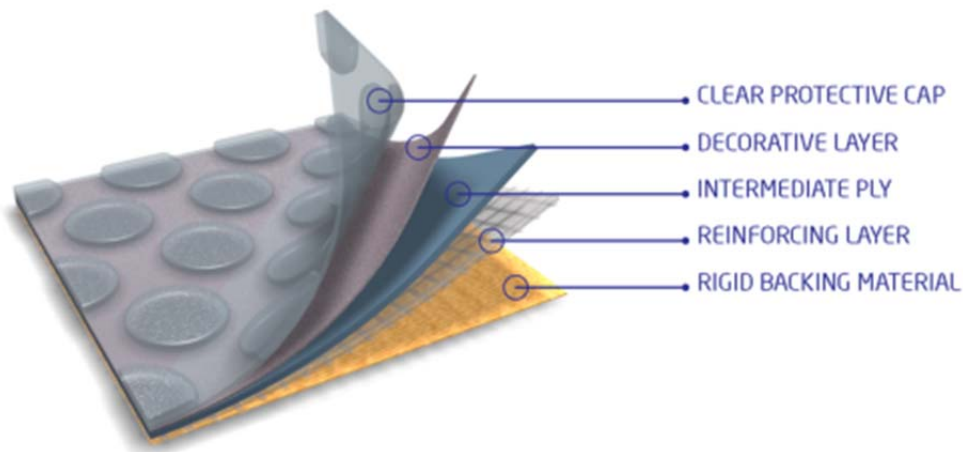

Product Characteristics:

Roll Widths: up to 59.5" (1.51cm)

Roll Length: 10-80 lyds (25 lyds -22.86m standard)

Thickness: 54 mil (1.37mm)

Weight: 2100 g/m2 (74oz/m2)

Lamination Process

A decorative surface layer is continuously bonded onto a reinforcing backing that is flexible enough to enable seamless rolls and stiff enough to provide telegraph resistance. High adhesion strength ensures durable all-in-one NTF assembly.
